

Hello-

We will be performing maintenance on three (3) existing wells in your community beginning Friday, Dec. 18 (see map below). It will take approximately five days per well to complete the well maintenance, and we will be using a work over rig and other heavy equipment. The community may notice a slight increase in traffic, approximately 7 - 10 trucks per day.

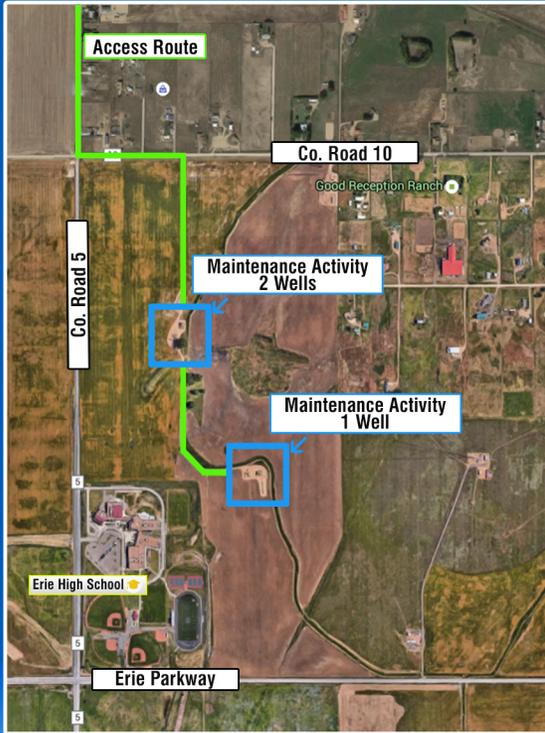

We are planning our activity with the community in mind. In order to accommodate the school schedule, our operations will last 24 hours a day and will continue through the holidays while students are away from school. We expect these operations to be completed when students return from winter break.

Thank you for your patience while we perform work in your community. If you have any questions or wish to report an issue related to our operation, please do not hesitate to contact us through the Anadarko Colorado Response Line: 1-866-248-9577 or e-mail at AnadarkoColorado@anadarko.com. We value your feedback.

Thank you,
Anadarko Petroleum Corporation

- Anadarko's planned well maintenance activity will last approximately 4-5 days per well.
- You will see a work over rig (pictured below), cement trucks, water trucks, and other heavy equipment on location.
- This procedure is regulated by the Colorado Oil and Gas Conservation Commission (COGCC) and will be conducted according to COGCC rules and regulations.
