PARTNERS IN ENERGY
An Xcel Energy Community Collaboration

Reap the Renewable Rewards

Investing in renewable energy like rooftop solar, provides an opportunity that will pay for itself through money saved on future energy bills, while increasing the value of your home.

STEP 1

Check your electricity bill.

See whether your provider is Xcel Energy or United Power. Renewable energy programs may vary by electricity provider.

STEP 2

Select the renewable energy program that's right for you.

If you are considering on-site solar, explore financing options to lower the initial investment. Boulder County residents are eligible for additional incentives.

STEP 3

Put efficiency first!

You can lower the upfront cost of renewable energy by reducing the total energy your home consumes. Look for Xcel Energy or United Power rebates to offset up to 60% of your upfront costs of efficiency projects!

Ready to start reaping the rewards?

Benefit Your Business and Go Renewable

On-site energy generation, like rooftop solar, can save you money on energy bills, provides a high return on investment, and can increase your property value.

STEP 1

Check your electricity bill.

See whether your provider is Xcel Energy or United Power. Renewable energy programs may vary by electricity provider.

STEP 2

Select the renewable energy program that's right for you.

If you are considering on-site solar, explore financing options to lower the initial investment. Boulder County residents are eligible for additional incentives.
